

STATE OF TEXAS §  
 COUNTY OF MIDLAND §

**RESOLUTION ON NUCLEAR WASTE TRANSPORTATION**

Midland County Commissioners Court recognizes it does not have any authority concerning nuclear waste transportation policy and procedures, use or restrictions of rail systems, and restricting use of interstate and state highways.

Midland County Commissioners Court recognizes a request by our local citizens to communicate their concerns about transporting nuclear waste through our county.

Therefore, after hearing lengthy public comments in open public Commissioner Court sessions, the Midland County Commissioners Court believes the following properly represents our communities concerns.

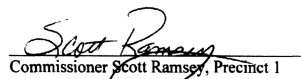

The citizens do not want any nuclear waste transported through Midland County. We urge the Federal Government to undertake the following to aid in a constructive dialogue on this matter and clarify any misinformation:

1. Hold local hearings along any designated route which includes Midland County.
2. Fully fund, equip, and train local first responders covering possible nuclear waste accidents in Midland County for the duration of the nuclear waste transport program.
3. Provide continuing inspections by the appropriate authorities of rails, interstate highways, and state highways which could be used for nuclear waste transportation.
4. Provide a complete explanation of why nuclear waste cannot be stored at the site it is currently being held or a permanent repository.
5. Provide a complete explanation of why nuclear waste must be moved twice.

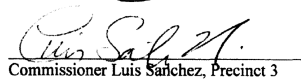

Thank you in advance for your cooperation.

Respectfully submitted this 24<sup>th</sup> day of April, 2017.

  
 Midland County Judge Mike Bradford

  
 Commissioner Scott Ramsey, Precinct 1

  
 Commissioner Robin Donnelly, Precinct 2

  
 Commissioner Luis Sanchez, Precinct 3

  
 Commissioner Randy Prude, Precinct 4

ATTEST:

  
 Alison Haley, Midland County Clerk
